DSG FRESH

DSG FRESH now transports over 5,000 temperature sensitive shipments annually by air, sea, road and rail. Whether your business is temperature-sensitive foodstuffs, or non-food merchandise like flowers, medicines or high-tech goods, DSG's in-house logistics experts understand that each commodity has its own unique transport and storage requirements.

Shelf life is critically dependent on proper cargo management. Our cold-chain professionals have the specialised skills to deal with the unique requirements of the perishables business.

Local Expertise

With over 100 years in the transport industry DSG has handled every type of temperature sensitive cargo within that time period. We have managed the movement of this cargo by all modes of transport to all parts of the world.

Our global network enables us to have the required knowledge to deliver your cargo to any part of the world.

How DSG Fresh Works

DSG provides integrated solutions to satisfy your door-to-door refrigerated and perishables supply chain requirements.

Temperature-sensitive cargo must be shipped in accordance with strict specifications, and DSG ensures that delicate cargo like this gets the best possible care. We achieve this by using state-of-the-art equipment and monitoring systems, and by partnering with experienced specialists strategically located around the world. Types of cargo we move include:

- Dairy Products
- Meat
- Pharmaceuticals
- Fresh Vegetables
- Fresh Fruit
- Seafood
- Live Plants
- Confectionery
- Convenience Products
- Chemicals
- Fish
- Juice Concentrate
- Sensitive Industrial Products
